

PRASANNA KUMAR

UI UX Designer & UI Developer

PrasannaKumarprasanna1199@gmail.com | +91 9944654625 | Madurai, Tamil Nadu, India

PROFESSIONAL SUMMARY

UI/UX Designer & Developer with 4 years of experience designing and building production interfaces — eliminating the handoff gap between Figma and code. I own the full pipeline: user research, wireframing, high-fidelity prototyping, and shipping accessible, responsive front-ends in React JS and AngularJS. For B2B platforms across global markets, this dual capability has significantly reduced design-to-development cycles, since I build what I design rather than handing it off to someone else to interpret. WCAG 2.1-compliant, Agile-native, and comfortable owning a project from requirement gathering to deployed code.

WORK EXPERIENCE

Freelance UI/UX Designer

Jan 2026 – Present

- Independently managed 3 client engagements end-to-end — requirement gathering, design, and delivery — without a team, delivering production-ready Figma files

UI UX Designer & Developer, Megsoft Business Solutions

Aug 2023 – Dec 2025

- Led end-to-end UI/UX design for a B2B web application serving international clients — built a shared component library and standardized interaction patterns early, which cut design iteration cycles by 30% by eliminating repeated back-and-forth over spacing, states, and edge cases.
- Designed and personally built 50+ wireframes and prototypes into production-ready AngularJS interfaces across global markets — choosing to prototype directly in code for complex flows where static Figma mockups couldn't capture real interaction states, reducing developer misinterpretation.
- Implemented WCAG 2.1 accessibility standards and semantic HTML structure across all front-end builds, achieving 100% compliance with audits for global user bases.
- Collaborated with product managers and developers in an Agile environment, consistently delivering sprint tasks on time across 10+ release cycles with zero critical design rework.

UI UX Designer & Developer, Bhive Technologies

Apr 2022 – Jul 2023

- Directed end-to-end UI/UX design across B2B platforms — since I could build the front-end myself in React, I skipped the redesign-after-handoff cycle most teams lose time to, increasing design-to-development efficiency by 40%.
- Engineered responsive front-end interfaces using React JS, React Bootstrap, and Bootstrap-5, delivering cross-device-compatible experiences for clients across 4+ international markets
- Collaborated with product and backend teams in an Agile/Scrum environment, contributing to sprint planning and design reviews to consistently deliver quality UI across every release cycle.

KEY SKILLS & TOOLS PROFICIENCY

Design & UX

Wireframing, Prototyping, User Flow, Design System, Mobile UI Design, Mockup Designing, Responsive Design, Ideation Sketching

UX Research

User Research, User Persona, Usability Testing, A/B Testing, Journey Mapping, Design Thinking, Information Architecture

Design Tools

Figma, Canva

Frontend Development

HTML5, CSS3, SCSS, React JS & Angular js (Only UI Development), Javascript, Bootstrap-5

Development & Collaboration Tools

Git, Jira, VS Code, Anti-gravity

Other

Prompt Engineering, UI Testing

CERTIFICATIONS

Foundations of User Experience (UX) Design

Issued by Google at Apr 2024
